

The Dolphin Institute Wish List

Desk Chairs

We want to be able to increase our number of volunteers, but we cannot do this if they don't have a place to sit!

USB Storage Drives

We often need to quickly transfer multiple files between computers so our volunteers can efficiently conduct research.

Office Phone

We have gotten many great years out of our current phone, but it is starting to get hard to hear people on the other end.

Electric Pencil Sharpener

Our staff goes through tons of pencils during our fluke processing.

Erasers

Our pencil erasers only last so long!

3-ring Notebooks

As we keep collecting more data, we need more binders to organize it.

Notebook binder dividers

We have much of our data sorted into 3-ring binders and we need more dividers to keep everything organized.

Plastic Slip Covers for 3-ring binder

By using slip covers we can better take care of specific documents rather than reprinting them continuously.

3-button Apple mice

We use all Apple computers in our office and the mice that come with them are single-button. Having a mouse with right-click abilities makes our data processing move a lot faster!

Folding table and chairs

Our education and outreach department is growing and we need equipment to bring to our school and community outreach events.

Final Cut video editing program

We have hours and hours of underwater video footage and we need a program that can better edit our material so we can prepare it for research and school presentations.
